

Duck-chul Lee
(D.C. Lee)

32 Oak Hill Court, Room 200, Pittsburgh, PA 15219
Department of Health and Human Development
School of Education
University of Pittsburgh
Phone: 412-383-4004; Fax: 412-383-4045, Email: dclee@pitt.edu

EDUCATION

- 03/92-02/00 **B.A.**, German Language and Literature. Department of German Language & Literature, College of Liberal Arts, Hanyang University, South Korea.
- 03/02-02/04 **M.S.**, Clinical Exercise Physiology & Sports Medicine. Department of Physical Education, College of Education, Seoul National University, South Korea. Thesis: "*The effects of exercise and nutrition education on the components of metabolic syndrome and physical fitness*"
- 03/04-08/07 **Ph.D.**, Physical Activity Epidemiology. Department of Physical Education, College of Education, Seoul National University, South Korea. Dissertation: "*A cohort study of exercise effect on chronic diseases – focusing on hypertension, diabetes, hyperlipidemia, and obesity*" in over 650,000 Korean adults from the Korean National Health Insurance Database.
- 11/07-07/12 **Post Doctoral** Research Fellow, Physical Activity Epidemiology. Department of Exercise Science, Arnold School of Public Health, University of South Carolina (Mentor: Dr. Steven N. Blair)

PROFESSIONAL EXPERIENCE / SERVICE

Positions and Employment

- 01/94-03/96 Military service, South Korean Army
- 08/00-02/02 Exercise Specialist (*International Youth Sports Center and Sports Club Green Hill* in South Korea)
- 09/04-06/07 Lecturer in Seoul National University, Kyung-won University, and Hoseo University in South Korea.
- 08/12-06/20 Research Consultant, Department of Exercise Science, Arnold School of Public Health, University of South Carolina
- 01/13-12/16 Courtesy Appointment, Department of Food Science and Human Nutrition, College of Human Sciences, Iowa State University
- 08/12-06/17 Assistant Professor, Department of Kinesiology, College of Human Sciences, Iowa State University
- 07/17-06/22 Associate Professor, Department of Kinesiology, College of Human Sciences, Iowa State University
- 07/22-05/24 Professor, Department of Kinesiology, College of Human Sciences, Iowa State University
- 06/24-Present Professor, Department of Health and Human Development, School of Education, University of Pittsburgh
- 07/22-Present Director, Physical Activity Research Center (PARC), School of Education, University of Pittsburgh

Certifications / Training

- 08/98 Life Sports Instructor License: Bodybuilding (Korea Ministry of Culture & Tourism)
- 09/04 Certificate of Athletic Trainer (The Korean Society of Sports Medicine)

06/05	Fitness Specialist for Older Adults (<u>The Cooper Institute, Texas, US</u>)
06/06	Certified Exercise Specialist (<u>Korean Exercise Instruction Association</u>)
06/06	Certified Strength & Conditioning Specialist (CSCS, <u>US National Strength and Conditioning Association</u>)
09/09	Physical Activity and Public Health Research Course (<u>US Centers for Disease Control and Prevention & University of South Carolina</u>)
07/10	The 36 th Ten-Day Seminar on the Epidemiology and Prevention of Cardiovascular Disease (<u>American Heart Association</u>)

Honors / Awards

1992	Baeknam Academic Award (4-year undergraduate free tuition and free dormitory boarding, \$24,000). <u>Hanyang University.</u>
1998	College of Liberal Arts Undergraduate Thesis Presentation Award (first place, \$500). <u>Hanyang University.</u>
2005	Study Abroad Award (visited Texas A&M University) (\$3,000). <u>Seoul National University.</u>
2010	Travel Stipend, The 36 th Ten-Day Seminar on the Epidemiology and Prevention of Cardiovascular Disease (\$500). <u>American Heart Association.</u>
2015	" <i>Top Ten Publication Award</i> " for the first author paper titled "Leisure-time running reduces all-cause and cardiovascular mortality risk" published in <i>JACC. Lifestyle and Cardiometabolic Health Council.</i> <u>American Heart Association.</u>
2015	" <i>Early Achievement in Research Award</i> ". College of Human Sciences. <u>Iowa State University.</u>
2016	Fellow of the American College of Sports Medicine (FACSM). <u>American College of Sports Medicine.</u>
2017	" <i>Early tenure and promotion</i> " to Associate Professor. <u>Iowa State University.</u>
2017	" <i>Atlas Award</i> ," international research award for the first author paper titled "Running as a key lifestyle medicine for longevity" published in <i>Progress in Cardiovascular Diseases</i> . This article was selected from published research articles around the world in over 2,500 science and medical journals such as <i>Lancet</i> , <i>JACC</i> , <i>Mayo Clinic Proceedings</i> . <u>Elsevier.</u>
2019	" <i>Paper of the Year</i> " award for the corresponding author paper titled "Associations of resistance exercise with cardiovascular disease morbidity and mortality" published in <i>Medicine & Science in Sports & Exercise.</i> <u>American College of Sports Medicine.</u>
2021	" <i>Mid-Career Achievement in Research Award</i> ". College of Human Sciences. <u>Iowa State University.</u>
2022	" <i>Paper of the Year</i> " award for the invited senior author paper titled "Aerobic or muscle-strengthening physical activity: Which is better for health?" published in <i>Current Sports Medicine Reports.</i> <u>American College of Sports Medicine.</u>
2023	" <i>Global Visiting Fellow</i> " award by Brain Korea 21 (BK21). <u>Seoul National University.</u>
2025	" <i>Dean's Distinguished Award-Above and Beyond.</i> " School of Education. <u>University of Pittsburgh.</u>

University Committees and Professional Services

2012-2013	Faculty Search Committee member for the Tenure-track assistant professor position in Kinesiology, Department of Kinesiology, ISU
2012-2014	Graduate Executive Committee member, Department of Kinesiology, ISU
2013-Present	Adviser, Korean Language Club (University Student Organization), ISU

2013-2014	Faculty Search Committee member for the Tenure-track assistant professor position in Physical Activity and Health, Department of Kinesiology, ISU
2013-2014	Ad hoc committee member "Community and Public Health" option review, Department of Kinesiology, ISU
2013-2014	International Committee member, College of Human Sciences, ISU
2014-2015	Kinesiology Department Building Renovation Project committee member, Department of Kinesiology, ISU
2013-2017	Executive Committee member, Department of Kinesiology, ISU
2015-2017	Data Driven Science Initiative (DDSI) Faculty Steering Committee, ISU (University committee to support President's vision for Big Data)
2015-2018	Social Committee member, Department of Kinesiology, ISU
2016-2017	Outcomes Assessment and Continuous Improvement Plan Committee <u>Chair</u> , Department of Kinesiology, ISU
2016-2017	Faculty Search Committee member for two Tenure-track assistant professor positions in "Physical Activity and Health" and "Kinesiology", Department of Kinesiology, ISU
2017-2018	Pease Family Scholar Committee member, Department of Kinesiology, ISU
2017-2020	Evaluation and Governance Committee member (<u>Chair</u> in 2019-2020), Department of Kinesiology, ISU
2017-Present	Pease Family Scholar Committee member (<u>Chair</u> , 2022-), Department of Kinesiology, ISU
2017-Present	Promotion and Tenure Committee member, Department of Kinesiology, Iowa State University
2018-2020	Appeals Committee member, Department of Kinesiology, ISU
2019-2023	Faculty Search Committee member for a Tenure-track assistant professor positions in "Physical Activity and Health", Department of Kinesiology, ISU
2019-2021	Kinesiology Representative to the ISU IRB, Department of Kinesiology, ISU
2021-2023	Diversity Committee <u>Chair</u> , Department of Kinesiology, ISU
2022	'2022 Physical Activity Guidelines for Koreans' project committee. Department of Physical Education. Seoul National University. Seoul, South Korea. 2022.
2022-Present	Physical Activity Committee member in the Lifestyle and Cardiometabolic Health Council, American Heart Association.
2023	'Outstanding Achievement in Research Award' Evaluation Committee member. Office of the Vice President for Research. ISU.
2023	Abstract Reviewer for Scientific Sessions 2023 (Philadelphia, PA on November 11-13), American Heart Association's Committee on Scientific Sessions Program, American Heart Association.
2024	Invited reviewer for Japanese National Physical Activity Guide (English version): "Physical Activity Guide for Health Promotion 2023". Health Service Bureau, Ministry of Health, Labour and Welfare. Japan.
2024-Present	Physical Activity Research Center (PARC) Committee chair, School of Education, University of Pittsburgh.
2024-Present	Promotion and Tenure Committee member, Department of Health and Human Development, University of Pittsburgh.

Professional Affiliations

1. American College of Sports Medicine, Member: 2005~; Fellow: 2016~.
2. American Heart Association, Member: 2008~.
3. American Public Health Association, Member: 2013~.
4. North American Artery Society, Member: 2014~.
5. The Obesity Society, Member: 2009~.
6. US National Strength and Conditioning Association, Member: 2006~.

Invited Journal Review (in alphabetical order. Selected major journals)

- American Journal of Epidemiology
- Annals of Internal Medicine
- British Journal of Sports Medicine
- British Medical Journal (BMJ)
- Circulation
- Diabetes
- Diabetes Care
- Hypertension
- Journal of Physical Activity and Health
- Journal of Sports Science and Medicine
- Journal of the American College of Cardiology (JACC)
- Journal of the American Medical Association (JAMA)
- Mayo Clinic Proceedings
- Medicine and Science in Sports and Exercise
- Obesity
- Pediatrics

Invited Grant Review

- Swiss National Science Foundation. Peer Review Panel Member. 2016.
- National Institutes of Health (NIH). *Neurological, Aging, and Musculoskeletal Epidemiology (NAME)* Study Section. Peer Review Panel Member (ad hoc reviewer). Arlington, VA, October 19-20, 2017. Total 46 out of 90 applications were discussed.
- National Institutes of Health (NIH). Special Emphasis Panel on “Integrated Metabolic Topics” [ZRG1-EMNR-B(02)M] study section. Reviewer. November 2nd, 2018. Total 13 applications were discussed.
- National Institutes of Health (NIH). *Biomedical Computing and Health Informatics (BCHI)* Study Section. Peer Review Panel Member (ad hoc reviewer). Seattle, WA, June 26-27, 2019. Total 55 out of 102 applications were discussed.

Data Safety and Monitoring Board

- WalkIT: Neighborhood walkability and moderation of adaptive walking interventions (R01CA198915. Project period: 8.1.2015-7.31.2020. PI: Marc A. Adams).

External Tenure and Promotion Reviewer

- Oregon State University. College of Public Health and Human Sciences. School of Biological and Population Health Sciences.
- West Virginia University. School of Public Health. Department of Epidemiology and Biostatistics. 2024

RESEARCH

Web of Science **h-Index=43** (Google Scholar h-index=59) since 2009. Lee has 21 papers with >100 citations per paper (7 as first author).

Referred Journal Publications (In chronological order. *Indicates mentored graduate student or post-doctoral fellow)

2005-2008 (In South Korea)

88. **Lee DC**, Brellenthin AG, Sui X, Blair SN. Running and mortality in adults with hypertension following the 2017 blood pressure guidelines. American Heart Association Scientific Sessions. Poster presentation. Chicago, IL, 2018.

2019

89. Brellenthin AG*, **Lee DC**. Alcohol consumption and cardiovascular disease mortality in adults with hypertension following the 2017 blood pressure guidelines. American Heart Association. Epidemiology and Prevention/Lifestyle and Cardiometabolic Health Annual Conference. Poster presentation. Houston, Texas. 2019.
90. Brellenthin AG*, **Lee DC**. Associations of fast walking with sleep quality and duration in older adults. American College of Sports Medicine Annual Meeting. Oral presentation. Orlando, Florida. 2019.
91. Albin E*, Brellenthin AG, **Lee DC**. Associations of cardiorespiratory fitness and muscular strength with arterial stiffness in older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Orlando, Florida. 2019.
92. Kim H*, Brellenthin AG, **Lee DC**. Muscular strength and whole-body bone mineral density in older adults with and without artificial joints. American College of Sports Medicine Annual Meeting. Poster presentation. Orlando, Florida. 2019.
93. Saavedra J*, Brellenthin AG, **Lee DC**. Cardiorespiratory fitness and body mass index with gastroesophageal reflux disease in Older Adult. American College of Sports Medicine Annual Meeting. Poster presentation. Orlando, Florida. 2019.
94. Gutiérrez-Martínez L*, Brellenthin AG, **Lee DC**. Effects of arterial stiffness between objectively measured physical activity and domain-specific cognition in older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Orlando, Florida. 2019.
95. McGrath R, **Lee DC**, Kraemer W. Handgrip strength and congestive heart failure in aging adults: Getting a grip on heart health. American College of Sports Medicine Annual Meeting. Poster presentation. Orlando, Florida. 2019.

2020

96. Cantón AP*, Brellenthin AG, **Lee DC**. Association of Muscle Quality and Prevalence of Diabetes in Older Adults. American College of Sports Medicine Annual Meeting. Poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.
97. Brellenthin AG*, **Lee DC**. Associations of Cardiorespiratory Fitness and Muscular Strength with Cognition in Older Adults. American College of Sports Medicine Annual Meeting. Poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.
98. Song BK*, Brellenthin AG, **Lee DC**. Associations between Muscular Strength and Digestive System Disorders in Older Adults. American College of Sports Medicine Annual Meeting. Poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.
99. Saavedra J*, Brellenthin AG, **Lee DC**. Stair climbing and sedentary behavior with Type 2 diabetes. American College of Sports Medicine Annual Meeting. Poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.
100. Gutiérrez-Martínez L*, Brellenthin AG, **Lee DC**. Associations between daily steps, stepping cadence, and arterial stiffness in older adults. American College of Sports Medicine Annual Meeting. Thematic poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.
101. Wolf T, Wolff M, Komjathy C, Brellenthin AG, **Lee DC**, Litchfield R, Lanningham-Foster L. Strategies for improving DASH diet compliance to reduce the risk of heart disease in hypertensive individuals. Society for Nutrition Education and Behavior Annual Meeting. Norfolk, VA. 2020. Cancelled due to the COVID-19 Pandemic.
102. **Lee DC**, Brellenthin AG. High-Intensity Interval Training Improves Cardiorespiratory Fitness in Prior Non-Responders to Traditional Aerobic Exercise. American College of Sports Medicine Annual Meeting. Late Breaking poster presentation. San Francisco, California. 2020. Cancelled due to the COVID-19 Pandemic.

2021

103. Bakker EA, **Lee DC**, Hopman MTE, Thijssen DHJ, Eijssvogels TMH. Impact of cardiovascular health status on the association between changes in physical activity and major cardiovascular events and mortality among 88,320 adults: outcomes of the Lifelines Cohort Study. European Association of Prevention Cardiology Annual Congress. ECS Preventive Cardiology 2021. Online Congress due to the COVID-19. Oral presentation at 'Young Investigators Award-Population Science and Public Health.' 2021.
104. Brellenthin AG, **Lee DC**, Lefferts EC, Song BK, Kim Y. Familial dementia versus healthy lifestyle on the risk of dementia. American Heart Association. Epidemiology and Prevention/Lifestyle and Cardiometabolic Health Annual Conference. Oral presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
105. **Lee DC**, Brellenthin AG, Lanningham-Foster L, Kohut ML, Li Y. Cardiovascular benefits of resistance, aerobic, and combined exercise (cardiorace). American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
106. Brellenthin AG, **Lee DC**, Lefferts EC, Kim Y. Association of vigorous-intensity physical activity with the risk of dementia. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
107. Song BK*, Saavedra JM, Lefferts EC, Brellenthin AG, **Lee DC**. Associations between cardiorespiratory fitness and diverticulitis in older adults. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
108. Saavedra JM*, Song BK, Brellenthin AG, **Lee DC**. Sui X, Blair SN. Association of cardiorespiratory fitness and body mass index with incident restrictive lung disease. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.

109. Kim H*, Song BK, Brellenthin AG, **Lee DC**. Association between muscular strength and low bone mineral density in older women. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
110. Kim G, Song BK, Kim J, Lefferts EC, Brellenthin AG, **Lee DC**, Kim Y. Associations between relative grip strength and type 2 diabetes mellitus: The Yangpyeong cohort of the KoGES. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.
111. Kim Y, Song BK, Kim G, Kim J, Lefferts EC, **Lee DC**. Association between quadriceps strength and type 2 diabetes in Korean older adults. American College of Sports Medicine Annual Meeting. ePoster presentation. Virtual Meeting due to the COVID-19 Pandemic. 2021.

2022

112. Brellenthin AG, **Lee DC**. Comparative effects of aerobic, resistance, and combined exercise on sleep. American Heart Association. Epidemiology and Prevention/Lifestyle and Cardiometabolic Health Annual Conference. Oral presentation. Chicago, IL, 2022.
113. **Lee DC**, Brellenthin AG. Effects of resistance, aerobic, or combined exercise on stress. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
114. Brellenthin AG, **Lee DC**. Comparative effects of aerobic, resistance, or combined exercise on anxiety. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
115. Song BK*, Lefferts EC, Saavedra JM, **Lee DC**. Associations of daily step count and sitting time with gastroesophageal reflux disease in older adults. American College of Sports Medicine Annual Meeting. ePoster presentation. San Diego, California. 2022.
116. Saavedra JM*, Lefferts EC, Song BK, **Lee DC**. Associations of body mass index and cardiorespiratory fitness with sleep apnea in older adults. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
117. Yoon J, **Lee DC**, Kim YS. Associations between physical activity, resting heart rate, and metabolic syndrome in Korean adults. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
118. Ma X, Ryu Y, Sung H, **Lee DC**, Kim YS. Associations of physical activity, mental health, and quality of life with sarcopenic obesity in elderly. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
119. Ryu Y, **Lee DC**, Kim YS. Associations between the status of sarcopenic obesity and osteoarthritis using the KNHANES 2014-2019 data. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
120. Han YM, Kim YS, **Lee DC**. Effects of an online weight management program on weight and physical activity changes. American College of Sports Medicine Annual Meeting. In-person presentation. San Diego, California. 2022.
121. Bakker EA, **Lee DC**, Ortega FB, Hopman MTE, Thijssen DHJ, Eijssvogels TMH. Changes in total, moderate and vigorous intensity physical activity are associated with mortality among 87,302 adults: the Lifelines Cohort Study. European College of Sport Science Annual Congress. Seville, Spain. 2022.
122. **Lee DC**, Lefferts EC, Saavedra JM, Song BK, Brellenthin AG. Increasing lifestyle walking by 3,000 steps/day lowers blood pressure in older adults with hypertension. International Society for Physical Activity and Health Congress. Poster presentation. Abu Dhabi, UAE. 2022.

2023

123. Lefferts EC*, Saavedra JM, **Lee DC**. Greater adherence to Life's Essential 8 is associated with lower arterial stiffness in cancer survivors. American College of Sports Medicine Annual Meeting. Poster presentation. Denver, Colorado. 2023.

124. Saavedra JM*, Lefferts EC, **Lee DC**. Associations of cardiorespiratory fitness and muscular strength with sleep apnea in older adults. American College of Sports Medicine Annual Meeting. Thematic poster presentation. Denver, Colorado. 2023.

125. Jouzi TR*, Lefferts EC, Saavedra JM, **Lee DC**. Associations of cardiorespiratory fitness and muscular strength with poor sleep quality in older adults. American College of Sports Medicine Annual Meeting. Thematic poster presentation. Denver, Colorado. 2023.

2024

126. **Lee DC**, Brellenthin AG. Effects of resistance, aerobic, or combined exercise on handgrip strength. American College of Sports Medicine Annual Meeting. Poster presentation. Boston, Massachusetts. 2024.

127. Brellenthin AG, Crombie KM, Sirotiak Z, Hillard CJ, Smith-Hernandez C, Koltyn KF, **Lee DC**. Endocannabinoid responses to aerobic, resistance, or combined exercise in adults with and without metabolic syndrome. American College of Sports Medicine Annual Meeting. Poster presentation. Boston, Massachusetts. 2024.

128. Brandner CF, Brellenthin AG, **Lee DC**. Comparative effects of aerobic, resistance, or combined exercise on body shape. American College of Sports Medicine Annual Meeting. Poster presentation. Boston, Massachusetts. 2024.

129. Porter FJ*, Saavedra JM, Zhai X, Jouzi TR, **Lee DC**. Independent and joint associations of cardiorespiratory fitness and body mass index with sleep quality and duration in older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Boston, Massachusetts. 2024.

130. Saavedra JM*, **Lee DC**. Associations of total daily steps and aerobic steps with respiratory impairment in older adults. American College of Sports Medicine Annual Meeting. Thematic poster presentation. Boston, Massachusetts. 2024.

131. Zhai X*, Saavedra JM, Porter FJ, Jouzi TR, **Lee DC**. Associations of total and aerobic steps with health-related quality of life in older adults. American College of Sports Medicine Annual Meeting. Thematic poster presentation. Boston, Massachusetts. 2024.

132. Sawada SS, Akimoto T, Kinoshita M, Nagasaka Y, Zhai X, Koriyama S, Sloan RA, Sui X, **Lee DC**, Lee IM. Running speed in school-age children and prevalence of diabetes mellitus in adulthood. American College of Sports Medicine Annual Meeting. Rapid Fire Platform presentation. Boston, Massachusetts. 2024.

133. Sawada SS, Shimizu S, Tsuneda U, Nakazawa Y, Suzuki K, Hirayama K, **Lee DC**. Sports participation and prevalence of frequent upper respiratory track infection. European College of Sport Science Annual Meeting. Poster presentation. Glasgow, UK. 2024.

134. Choi Y, Han Y, Sung H, Yoon J, **Lee DC**, Kim YS. Joint associations of hypertension and meeting both aerobic and muscle strengthening recommendations with mortality. European College of Sport Science Annual Meeting. Poster presentation. Glasgow, UK. 2024.

2025

135. Saavedra JM, Downer B, Lefferts EC, **Lee DC**. Independent and joint associations of pulmonary function and muscular strength with metabolic syndrome in lung healthy older adults. Texas Chapter of American College of Sports Medicine Annual Meeting. Poster presentation. Waco, Texas. 2025.

136. Yoon J*, Goode NJ, Lefferts EC, Kline CE, **Lee DC**. Associations of resistance and aerobic exercise with recommended sleep duration in older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Atlanta, Georgia. 2025.

137. Saavedra JM, Downer B, Lefferts EC, **Lee DC**. Associations of pulmonary function and muscular strength with metabolic syndrome in lung healthy older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Atlanta, Georgia. 2025.

138. Goode NJ*, Yoon J, Lefferts EC, **Lee DC**. Association of daily steps with the prevalence of polypharmacy in older adults. American College of Sports Medicine Annual Meeting. Poster presentation. Atlanta, Georgia. 2025.
139. Zhu X, Sawada SS, Wang D, Hirayama R, Kawakami R, Yoshiba K, Yoshioka N, Lee IM, Sue X, **Lee DC**, Kai Y, Arao T. Subjective happiness and vitality in relation to experience of supporting the Japanese football league. American College of Sports Medicine Annual Meeting. Poster presentation. Atlanta, Georgia. 2025.
140. Sawada SS, Chida T, **Lee DC**. Caffeine intake and the prevalence of leg cramps: cross-sectional study. European College of Sport Science Annual Meeting. Poster presentation. Limini, Italy. 2025.

Invited Presentations (in chronological order)

1. **Lee DC**. Health benefits of getting active and fit for everyone. Korean United States Applied Physiology Society (KUSAPS). San Francisco, California, 2012.
2. **Lee DC**. Physical activity and health. Korean-American Scientists and Engineers Association (KSEA). Iowa State University. Ames, Iowa, 2013.
3. **Lee DC**. The key to a long and healthy life: physical activity and fitness. A series of research brown bag. Master of Public Health Program. College of Health Sciences. Des Moines University. Des Moines, Iowa, 2014.
4. **Lee DC**. Aerobic and resistance exercise training on blood pressure. Physical Activity Publications Conference. Pennington Biomedical Research Center. Baton Rouge, Louisiana, 2014.
5. **Lee DC**. Health benefits of physical activity and cardiorespiratory fitness. Research Seminar in the Department of Exercise Science and Health Promotion. School of Nutrition and Health Promotion. College of Health Solutions. Arizona State University. Phoenix, Arizona, 2016.
6. **Lee DC**. Optimal dose of running for longevity-Is more better or worse? American College of Sports Medicine annual meeting Exercise Is Medicine Symposium (Session title: Optimal Dose of Running for Health_Is more Better or Worse?). Boston, Massachusetts. 2016.
7. **Lee DC**. Effect of long-term endurance exercise on cardiovascular health: Can too much of a good thing actually be bad? The 26th Scientific Meeting of the International Society of Hypertension. Seoul. South Korea. 2016. Invited as a distinguished speaker.
8. **Lee DC**. Health benefits of physical activity and fitness: What type of physical activity is best for health? Department of Physiology. Radboud University Medical Center. Nijmegen, The Netherlands. 2017.
9. **Lee DC**. Running for Longevity: Is more better or worse?. Korean United States Applied Physiology Society (KUSAPS). Minneapolis, Minnesota, 2018.
10. **Lee DC**. Hulk vs. Flash: Who is Healthier and Lives Longer? American College of Sports Medicine annual meeting Basic Science World Congress – Highlighted Symposium (Session title: What if Fixx and Cooper were Lifters? The Health benefits of Resistance Exercise). Minneapolis, Minnesota. 2018.
11. **Lee DC**. What is the best type of exercise: endurance or strength training? American College of Sports Medicine annual meeting Exercise Is Medicine Symposium (Session title: What Dose, Type and Intensity of Exercise is the Best Medicine?). Orlando, Florida. 2019.
12. **Lee DC**. CardioRACE project: How to run exercise RCTs. Department of Physical Education. Seoul National University. Seoul, South Korea. 2019.
13. **Lee DC**. What type and does of physical exercise is the best medicine? Department of Physical Education and Sports. University of Granada. Granada, Spain. 2019.
14. **Lee DC**. Key issues in the design and implementation of exercise-based RCTs. Department of Education. University of Almeria. Almeria, Spain. 2019.

15. **Lee DC.** Key issues in exercise RCTs. Department of Physiology. Radboud University Medical Center. Nijmegen, The Netherlands. 2019.
16. **Lee DC.** The keys to a long and healthy life: Physical activity and fitness. Focused Seminar led by prestigious scholars. Department of Physical Education. Seoul National University. Seoul, South Korea. 2020. Virtual presentation due to the COVID-19 pandemic.

GRANTS

Pending

- | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12/25-11/28 | <p>Dose-response effects of resistance exercise on sleep</p> <p>Principal Investigator: Lee, Duck-chul</p> <p>Source: <u>NIH (NHLBI) R01</u> (\$2,354,047 Total Requested).</p> <p>This randomized controlled trial will test the dose-response relationship between resistance exercise and sleep in adults with overweight or obesity.</p> |
| 12/25-11/29 | <p>Dose-response effects of resistance exercise on brain health in mid- and late-life obesity (DoReps-Cog)</p> <p>Principal Investigator: Gujral, Swathi (University of Pittsburgh)</p> <p>Source: <u>NIH (NHLBI) R01</u> (\$3,074,667 Total Requested).</p> <p>This study will identify the minimal and optimal dose of resistance exercise for improving cognition and brain health in middle-aged and older adults</p> |

	with overweight or obesity. Role: Co-I
12/25-11/27	<p>Machine learning models for predicting treatment response to resistance, aerobic, or combined exercise training in overweight or obese adults</p> <p>Principal Investigator: Crombie, Kevin (University of Alabama) Source: <u>NIH (NHLBI) R21</u> (\$256,168 Total Requested). This secondary data analysis project will harness machine learning algorithms and the extensive CardioRACE dataset to aid in the development of personalized exercise prescriptions for maximizing cardiovascular and mental health benefits of exercise. Role: Co-I</p>
12/25-05/26	<p>Orienteering walk on cognitive function among older adults with subjective cognitive decline: A pilot mixed-method study</p> <p>Principal Investigator: Zhai, Xiangyu (University of Hong Kong) Source: <u>Health and Medical Research Fund</u>, Health Bureau, Hong Kong (\$64,300 Total Requested). This mixed-methods study (randomized controlled trial and qualitative process evaluation) will explore the effects of orienteering walk, incorporating navigational tasks into walking, on cognitive function and assess the feasibility of implementation in older adults with subjective cognitive decline. Role: Co-I</p>
01/26-12/30	<p>Mechanisms of subclinical cardiovascular disease following pregnancy: impact of placental health and function</p> <p>Principal Investigator: Kozai, Andrea (University of Pittsburgh) Source: NIH (NHLBI) K01 (K01HL184039) (\$803,642 Total Requested) This Career Development K01 Award will prepare Dr. Kozai to implement an independent research career with expertise in placental pathophysiology, vascular biology, and exercise physiology. Role: Co-Mentor (Primary mentor: Janet Catov)</p>
<u>Funded</u>	
12/23-11/28	<p>Dose-response to resistance exercise on cardiovascular health (DoReps)</p> <p>Principal Investigator: Lee, Duck-chul (MPI: Lee, I-Min) Source: <u>NIH (NHLBI) R01</u> (R01HL171098) (\$3,466,211 Total Funded). This randomized controlled trial will test the dose-response relationship between resistance exercise and cardiovascular disease risk factors in adults with overweight or obesity.</p>
01/25-01/26	<p>Dose-response effects of resistance training on brain health in mid- and late-life obesity (DoReps-Cog) pilot study</p> <p>Principal Investigator: Gujral, Swathi (University of Pittsburgh) Source: <u>University of Pittsburgh Department of Psychiatry Pilot Grant & BRIDE Center SEED Grant</u> (\$43,500 Total Funded). This ancillary study to DoReps trial is to investigate the effects of different doses of resistance exercise on brain health via cognition and MRI tests. Role: Co-I</p>
09/23-08/28	<p>Developing, validating, and implementing an epidemiological instrument to assess the effect of resistance training on measures of cardiometabolic disease</p> <p>Principal Investigator: Booker, Robert (Northwestern University) Source: <u>NIH (NHLBI) K99/R00</u> (K99HL168338) (\$1,015,420 Total</p>

	Requested) This Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC K99/R00) award is to prepare Dr. Booker to become an independent investigator with expertise in resistance training epidemiology, with a specific emphasis on survey development and cohort implementation. Role: Co-Mentor (Primary mentor: Mercedes Carnethon)
06/23-03/28	ActiveCBT for depression: Transforming treatment through exercise priming Principal Investigator: Meyer, Jacob Source: <u>NIH (NIMH) R61/R33 (R61MH129407)</u> (\$3,700,435 Total Requested) This ActiveCBT study will test the effects of a novel intervention approach for depression, intentionally sequencing aerobic exercise immediately prior to cognitive behavioral therapy (CBT) sessions to take advantage of the short-term effects of exercise to increase the potency of the psychotherapy. Role: Co-I (2023-2024)
09/21-08/24	The effect of exercise on the endocannabinoid system as a pathway to cardiometabolic health in adults with overweight/obesity Principal Investigator: Brellenthin, Angelique G. Source: <u>NIH (NIDDK) R21 (R21DK131429)</u> (\$404,264 Total Funded). This study is to determine the effects of 1 year of aerobic, resistance, and combined exercise training on the endocannabinoid system and cardiometabolic risk factors in adults with overweight-obesity. Role: Co-I
07/16-04/22	Comparison of the <u>cardiovascular</u> benefits of <u>resistance</u>, <u>aerobic</u>, and <u>combined exercise</u> (CardioRACE) Principal Investigator: Lee, Duck-chul Source: <u>NIH (NHLBI) R01 (R01HL133069)</u> (\$3,355,624 Total Funded). This research is to investigate the comparative effectiveness of the cardiovascular benefits of resistance, aerobic, and a combined exercise by conducting 1) a large cohort data analysis using the Aerobics Center Longitudinal Study and 2) a 1-year randomized controlled trial in 400 adults who are at high risk of developing cardiovascular diseases.
05/21-05/22	Examining cerebral pulsatility as a mechanism behind the protective effects of exercise on the brain Principal Investigator: Lefferts, Wesley K. Source: <u>Iowa State University College of Human Sciences Untenured Faculty Seed Grant</u> (\$10,000 Total Funded). The goal of this project is to examine if cerebral blood flow pulsatility is a mechanism behind the protective effects of exercise on the brain and cognitive function in middle-age adults. Role: Senior Faculty Mentor
05/21-05/22	The effect of exercise on the endocannabinoid system as a pathway to cardiometabolic health Principal Investigator: Brellenthin, Angelique G. Source: <u>Iowa State University College of Human Sciences Untenured Faculty Seed Grant</u> (\$10,000 Total Funded). The goal of this project is to mechanistically determine whether changes in endocannabinoid receptors or enzymes mediate the effects of exercise training on cardiometabolic health in adults with metabolic syndrome. Role: Senior Faculty Mentor
05/19-04/20	<u>Endocannabinoid System Responses to <u>Resistance</u>, <u>Aerobic</u>, and <u>Combined Exercise</u> (E-RACE)</u>

- Principal Investigator: Brellenthin, Angelique G.
Source: Iowa State University Postdoctoral Seed Grant (\$2,400 Total Funded).
The goal of the proposed project is to evaluate the effects of different types and combination of exercise training on the endocannabinoid system.
Role: Senior Faculty Mentor
- 08/18-02/19 **Statistical causal inference analyses of the effect of physical activity on cardiovascular disease and diabetes**
Principal Investigator: Wang, Chong
Source: Central Plains Federal Statistical Research Data Center (CPRDC) (\$10,000 Total Funded).
This project is to study the effect of physical activity on cardiovascular disease and diabetes as well as related outcomes (blood pressure, blood sugar, mortality etc.) through statistical causal inference methods.
Role: Co-I
- 07/18-06/19 **Determining the Dimensions of the Priming Window of Exercise in Major Depression**
Principal Investigator: Meier, Jacob
Source: Iowa State University College of Human Sciences (\$10,000 Total Funded).
The goal of the proposed project is to develop an innovative exercise plus psychotherapy treatment for major depressive disorder.
Role: Senior Faculty Mentor
- 10/15-05/19 **Physical activity and sarcopenia**
Principal Investigator: Lee, Duck-chul
Source: Biospace (\$20,000 Total Funded).
This research is to investigate the associations of physical activity and fitness with sarcopenia in 300 older adults by conducting a 1-year prospective observational study.
- 05/14-04/16 **Independent and combined effects of aerobic and resistance training on blood pressure**
Principal Investigator: Lee, Duck-chul
Source: Iowa State University College of Human Sciences (\$25,000 Total Funded).
The proposed research will compare the effects of aerobic training, resistance training, and a combination of both on blood pressure and other CVD risk factors by conducting a 8-week randomized controlled trial.
- 12/12-06/13 **Independent and combined associations of aerobic and resistance exercise with blood pressure**
Principal Investigator: Lee, Duck-chul
Source: Iowa State University College of Human Sciences Untenured Faculty Seed Grant (\$10,000 Total Funded).
The proposed research will compare the associations of aerobic exercise, resistance exercise, and a combination of both with blood pressure by conducting a cross-sectional study in 400 adults.
- 01/09-12/12 **Research grant from The Coca-Cola Company** (Analyses in the Aerobics Center Longitudinal Study) – Year 1, 2, 3, and 4
Principal Investigator: Blair, Steven N.
Source: Coca-Cola Company (\$45,000 per year for 4 years).
This study analyzed the associations of physical activity and physical fitness with health from the Aerobics Center Longitudinal Study.
Role: Postdoc (Data analysis and manuscript development)
- 05/10-04/12 **Understanding patterns of change in obesity and physical activity in**

adults

- Principal Investigator: Sui, Xuemei
Source: NIH/NIDDK (R21 DK088195-01) (\$398,750 Total Funded).
The goal of this study is to expand our knowledge of the patterns of changes in weight and activity during adulthood using the Aerobics Center Longitudinal Study database.
Role: Postdoc (Study design, data analysis, and manuscript development)
- 08/09-07/10 **Korea NEST Foundation postdoctoral research fellowship grant**
Principal Investigator: Lee, Duck-chul
Source: Korea NEST Foundation (\$25,000 Total Funded).
The goal of this grant was to study cardiorespiratory fitness and physical activity on health using the Aerobics Center Longitudinal Study.
- 08/07-07/08 **Seoul National University Study Abroad Research Grant**
Principal Investigator: Lee, Duck-chul
Source: Seoul National University (\$15,000 Total Funded).
The purpose of this grant was to study physical activity epidemiology in the University of South Carolina.
- 11/06-07/07 **Cost-effectiveness analysis of regular exercise and sport participation using Korean National Health Insurance Data**
Principal Investigator: Park, Ilhyeok.
Source: Seoul Olympic Sports Promotion Foundation (\$200,000 Total Funded).
This study investigated the economical effects of exercise and sports participation through analyzing Korean National Health Insurance Data.
Role: Study Design and Data Analysis
- 06/04-09/04 **Weight management and exercise prescription system development using information technology (IT)**
Principal Investigator: Kim, Yeonsoo
Source: Samsung Electronics (\$30,000 Total Funded).
This project formulated an exercise prescription program for weight management using information technology.
Role: Exercise prescription and programming

Awarded and Declined

- 07/16-6/19 **Comparison of the cardiovascular benefits of resistance, aerobic, and combined exercise (Cardio-RACE)**
Principal Investigator: Lee, Duck-chul
Source: American Heart Association (\$231,000 Total Requested. Scored at 0.01 percentile rank and awarded, but declined to receive an alternative NIH R01 award, funded at the same time in June 2016).
This project is to investigate the mechanistic pathways of resistance and aerobic exercise on inflammatory and immune responses by conducting a 6-month randomized controlled trial in 120 adults.

Not Funded

- 09/24-08/28 **Dose-response of resistance exercise on sleep**
Principal Investigator: Lee, Duck-chul
Source: NIH R01 (\$2,123,505 Total Requested).
This study will test the dose-response effects of resistance exercise on subjective and objective (actigraphy and polysomnography) measures of sleep quality and quantity in adults with overweight or obesity.

- 12/22-11/27 **Challenging the Habitual Aerobic Exercise Maladaptation Problem (CHAMP)**
Principal Investigator: Lee, Duck-chul
Source: NIH (NHLBI) R01 (\$3,754,391 Total Requested).
This study is to test a high-intensity interval training as an alternative exercise for non-responders, find possible causes of non-responders, and explore mechanisms and predictors of non-responders via a total 9 months randomized controlled trial in 400 adults with overweight or obesity.
- 07/22-06/27 **Resistance exercise to treat major depression via cerebrovascular mechanisms: Confirming efficacy and examining response heterogeneity**
Principal Investigator: Meyer, Jacob
Source: NIH (NIMH) R01 (\$3,558,840 Total Requested).
This project will investigate the efficacy of a 16-week resistance exercise training program for treatment of major depressive disorder via enhancing cerebrovascular mechanisms and exploring sources of response heterogeneity.
Role: Co-I
- 07/22-06/24 **Genetic susceptibility, physical activity and fitness, and risk of breast and colon cancer**
Principal Investigator: Kim, Youngwon
Source: NIH (NCI) R21 (\$230,441 Total Requested).
This project will examine the associations between objectively measured physical activity/fitness with the development of colon and breast cancer in individuals with high genetic predisposition.
Role: Subcontract PI (\$51,061 Total Requested)
- 03/22-02/27 **ActiveCBT for Depression: Transforming treatment through exercise priming**
Principal Investigator: Meyer, Jacob
Source: NIH (NIMH) R61/R33 (\$2,984,994 Total Requested)
This research will investigate the effects of a novel intervention approach for depression, intentionally sequencing aerobic exercise immediately prior to cognitive behavioral therapy (CBT) sessions to take advantage of the powerful short-term biological and psychological effects of exercise to increase the potency of the psychotherapy (termed 'ActiveCBT').
Role: Co-I
- 04/22-03/27 **Targeting cerebral Pulsatility through Aerobic exercise Training in mlddLe agE (PulsATILE Trial)**
Principal Investigator: Lefferts, Wesley K.
Source: NIH (NHLBI) R01 (\$2,822,667 Total Requested).
This research will investigate whether improving cardiorespiratory fitness via exercise training reduces cerebral pulsatility and its mechanistic contributors and whether changes in cerebral pulsatility are associated with changes in cognitive function following exercise training.
Role: Co-I
- 11/21-10/25 **Alternative solution, mechanisms, and prediction of exercise non-responders (ASPEN)**
Principal Investigator: Lee, Duck-chul
Source: NIH (NHLBI) R01 (\$2,935,158 Total Requested).
This project is to develop predictive models of exercise non-responders using large pooled exercise trial datasets and test the benefits of 6-month high-intensity interval training (HIIT) to improve cardiorespiratory fitness (CRF) and cardiovascular disease (CVD) risk factors in prior non-

- responders to traditional aerobic exercise and possible mechanistic pathways linking HIIT to CRF and CVD risk factors.
- 07/21-06/22 **Aerobic exercise training to improve cerebral pulsatility: a mechanistic pilot randomized controlled trial**
Principal Investigator: Lefferts, Wesley K.
Source: American College of Sports Medicine (ACSM) Research Endowment (\$10,000 Total Requested).
The goal of this study is to examine if blood flow pulsatility in the brain is amenable to aerobic exercise training in middle-age and related to changes in cognitive function.
Role: Collaborator
- 07/21-06/22 **Endocannabinoid system adaptations to long-term exercise training in adults at-risk for cardiometabolic disease**
Principal Investigator: Brellenthin, Angelique G.
Source: American College of Sports Medicine (ACSM) Research Endowment (\$10,000 Total Requested).
The goal of this project is to investigate endocannabinoid system adaptations in response to 12 months of aerobic, resistance, or combined aerobic and resistance exercise in a subsample of 32 adults with overweight/obesity who recently completed a clinical exercise trial.
Role: Collaborator
- 07/21-06/22 **The effect of aerobic exercise on the severity of irritable bowel syndrome in older adults**
Principal Investigator: Song, Bong Kil (MPI: Lee, Duck-chul)
Source: American College of Sports Medicine (ACSM) Paffenbarger-Blair Fund for Epidemiological Research on Physical Activity (\$10,000 Total Requested).
This project will evaluate the effects of aerobic exercise on traditional and emerging irritable bowel syndrome risk factors/markers by conducting a 12-week randomized controlled trial.
- 01/21-12/22 **Factors related to osteosarcopenic obesity in adults with Down syndrome**
Principal Investigator: Pitchford, Andrew
Source: Jerome Lejeune Foundation (\$40,000 Euro Total Requested).
This project is to study the risk factors associated with early onset of osteosarcopenic obesity and/or its components in adults with Down syndrome compared to adults without disability.
Role: Co-Investigator
- 04/21-03/26 **Refinement and preliminary testing of ActiveCBT for depression**
Principal Investigator: Meyer, Jacob
Source: NIH (NIMH) R61/R33 (\$3,033,456 Total Requested).
This project is to investigate the effects of aerobic exercise immediately prior to cognitive behavior therapy (CBT) sessions to enhance the effects of CBT session in people with depression.
Role: Co-Investigator
- 04/21-03/25 **Cardiovascular health adaptations and mechanisms of high-intensity interval training in prior non-responders**
Principal Investigator: Lee, Duck-chul
Source: NIH (NHLBI) R01 (\$2,999,089 Total Requested).
This project is to investigate whether HIIT exercise is effective to improve cardiorespiratory fitness and cardiovascular disease (CVD) risk factors for prior non-responders to traditional aerobic exercise and possible

- mechanistic pathways (e.g., through arterial stiffness) between HIIT and CVD risk factors.
- 07/20-06/24 **Cardiovascular Benefits of High-Intensity Interval Training Among Prior Non-Responders (CHAMP)**
Principal Investigator: Lee, Duck-chul (MPI: Brellenthin, Angelique G.)
Source: NIH (NHLBI) R01 (\$1,541,143 Total Requested).
This study is to investigate whether HIIT exercise is effective to improve cardiorespiratory fitness for prior non-responders to traditional aerobic exercise and possible mechanistic pathway of the endocannabinoid system between various types, combinations, and intensities of exercise and cardiorespiratory fitness.
- 12/18-11/20 **Cardiovascular fitness standards to promot cardiometabolic health in adults**
Principal Investigator: Laurson, Kelly R.
Source: NIH R21 (\$91,512 Total Requested)
The goal of the proposed project is to develop cardiorespiratory fitness standards in adults based on objectively measured treadmill exercise test and clinical indicators such as blood pressure, fasting glucose, body fatness, and blood lipids using the nationally representative data (NHANES).
Role: Co-Investigator
- 07/15-06/16 **Optimal dose of running for chronic disease prevention and longevity**
Principal Investigator: Lee, Duck-chul
Source: American College of Sports Medicine (\$10,000 Total Requested).
This research is to investigate dose-response relationships between leisure-time running and cardiovascular health outcomes.
- 07/15-06/17 **Resistance exercise and muscular strength on diabetes, obesity, and metabolic health**
Principal Investigator: Lee, Duck-chul
Source: NIH/NIDDK (R21) (\$419,487 Total Requested).
The proposed research will investigate the effects of resistance exercise and muscular strength on diabetes, obesity, and metabolic health.
- 07/15-06/17 **Independent and combined cardiovascular effects of aerobic and resistance exercise**
Principal Investigator: Lee, Duck-chul
Source: NIH/NHLBI (R21) (\$231,108 Total Requested).
The proposed research will investigate the effects of resistance exercise, independent of and combined with aerobic exercise on cardiovascular disease morbidity and mortality.
- 07/15-06/17 **Influence of CVD risk factors on clinical outcomes in law enforcement officers**
Principal Investigator: Franke, Warren D.
Source: NIOSH (R03) (\$150,000 Total Requested).
The objective of this proposal is to test the hypothesis that conventional CVD risk factors are primary contributors to the development of CVD in law enforcement officers over time.
Role: Co-investigator (Data collection, analysis, and interpretation)
- 09/13-08/15 **Comparisons of the health benefits of aerobic, resistance, and combined Exercise**
Principal Investigator: Lee, Duck-chul
Source: NIH/NHLBI (R21) (\$225,759 Total Requested). (Scored at 15th percentile).

The proposed research will investigate the effects of resistance exercise and muscular strength, independent of and combined with aerobic exercise and cardiorespiratory fitness, on cardiovascular disease morbidity and mortality using a large prospective cohort study data from the Aerobics Center Longitudinal Study.

- 07/13-06/17 **Effects of aerobic and resistance training on cardiovascular health**
Principal Investigator: Lee, Duck-chul
Source: NIH/NHLBI (K01) (\$552,420 Total Requested).
The goal of this study is to conduct a randomized controlled exercise trial to examine the independent and combined effects of aerobic and resistance training on blood pressure and other cardiovascular disease risk factors.
- 07/12-06/17 **Effects of resistance exercise and muscular strength on cardiovascular health**
Principal Investigator: Lee, Duck-chul
Source: NIH/NHLBI (K99/R00) (\$743,000 Total Requested). (Scored at 45th percentile).
The goal of this study is to conduct a randomized controlled exercise trial to examine the effects of resistance exercise and muscular strength on cardiovascular health.

TEACHING

- 2004 **Weight Training** (undergraduate course), Hoseo University in South Korea
Instructor: Lee, DC.
- 2005 **Exercise Physiology** (graduate and undergraduate courses), Hoseo University in South Korea
Instructor: Lee, DC.
- 2005 **Human Physiology** (graduate course), Hoseo University in South Korea
Instructor: Lee, DC.
- 2006 **Human Anatomy** (undergraduate course), Kyung-Won University in South Korea
Instructor: Lee, DC.
- 2006 **Exercise Testing and Prescription** (undergraduate course), Hoseo University in South Korea
Instructor: Lee, DC.
- 2006-2007 **Physical Fitness Training** (undergraduate course), Seoul National University in South Korea
Instructor: Lee, DC.
- 2010 **Controlled Trials in Exercise Science. EXSC 755B** (graduate course, enrollment=7), University of South Carolina
Instructor: Blair, SN., Lee, DC., and Sui, X.
- 2012 **Physical Activity Epidemiology Research & Practice. EXCS 700** (graduate course, enrollment=18), University of South Carolina
Instructor: Blair, SN., Lee, DC., and Sui, X.
- 2012 **Physical Activity Epidemiology & Research Method. EXCS 882** (graduate course, enrollment=4), University of South Carolina
Instructor: Blair, SN., Lee, DC., and Sui, X.
- 2013 **Physical Activity Assessment for Health Related Research. KIN 570** (graduate course, enrollment=8), Iowa State University
Instructor: Lee, DC.
- 2013-2024 **Human Diseases. HS 350** (undergraduate core course, average enrollment=150-200), Iowa State University
Instructor: Lee, DC and Kohut, M

2014-2024	Physical Activity Epidemiology. HS 464/564 (undergraduate and graduate dual-listed course, enrollment=35-70), Iowa State University Instructor: Lee, DC.
2024	Advanced Research Methods in Movement Science. HHD 3400 (graduate course), University of Pittsburgh Instructor: Lee, DC.
2024-	Directed Study. HHD 2998 (graduate course), University of Pittsburgh Instructor: Lee, DC.
2024-	Directed Study. HHD 3998 (graduate course), University of Pittsburgh Instructor: Lee, DC.
2025-	Advanced Research Methods in Physical Activity Epidemiology. HHD 3402 (graduate course), University of Pittsburgh Instructor: Lee, DC.

Graduate Students and Research Staff Trained/Supervised

During Post-doctoral Fellowship at University of South Carolina

1. Jason R. Jagers, University of South Carolina, U.S.A. (2008). Incidence of metabolic syndrome with regular and sugar free soft drink consumption. Independent study research mentoring.
2. Vaughn Barry, University of South Carolina, U.S.A. (2008). Cardiorespiratory fitness, percent body fat and all-cause mortality in women. Independent study research mentoring.
3. Nancy L. Chase, University of South Carolina, U.S.A. (2008). The Association of cardiorespiratory fitness and physical activity with incidence of hypertension in men. Research mentoring.
4. Mariane Héroux, Queen's University, Canada (2009). Dietary patterns and the risk of mortality: impact of cardiorespiratory fitness. Thesis research mentoring.
5. Enrique G. Artero, University of Granada, Spain (2009). A prospective study of muscular strength and all-cause mortality in men with hypertension. Research mentoring.
6. Jong-gyu Kim, University of South Carolina, U.S.A. (2009). The association of heart rate recovery with stroke. Research mentoring.
7. Rui Liu, University of South Carolina, U.S.A. (2009). The association of cardiorespiratory fitness, muscular strength, and physical activity with depressive symptoms. Dissertation research mentoring.
8. Sara L. Sugar, The association of cardiorespiratory fitness and adiposity with hypertension. Dissertation research mentoring.
9. John C. Sieverdes, University of South Carolina, U.S.A. (2009). Physical activity, cardiorespiratory fitness, and the incidence of type 2 diabetes in a prospective study of men. Research mentoring.
10. Anna E. Mathews, University of South Carolina, U.S.A. (2009). Fitness and adiposity as predictors of functional limitation in adults. Research mentoring.
11. Jonathan A. Mitchell, University of South Carolina, U.S.A. (2010). The impact of combined health factors on cardiovascular disease mortality. Research mentoring.
12. Jennifer Gander, University of South Carolina, U.S.A. (2010). Self-rated health status and cardiorespiratory fitness as predictors of mortality in men. Independent study research mentoring.
13. Erin K. Howie, University of South Carolina, U.S.A. (2010). Alcohol consumption and risk of all-cause and cardiovascular disease mortality in men. Research mentoring.
14. Joseph Alemany and Vanessa Rettinger, University of South Carolina, U.S.A. (2010). Alcohol consumption and risk of metabolic syndrome. Research mentoring.

15. Rahma Ajja, University of South Carolina, U.S.A. (2010). Usefulness of Serum Bilirubin and Cardiorespiratory Fitness as Predictors of Mortality in Men. Independent study research mentoring.
16. Hashel Al Tunaiji, University of British Columbia, Canada (2011). Cardiorespiratory fitness and type 2 diabetes. Research mentoring.
17. Kara Goodrich and Shannon Cornelius, University of South Carolina, U.S.A. (2011). Associations of cardiorespiratory fitness and parental history of diabetes with risk of type 2 diabetes. Research mentoring.
18. Robin Shook and Vivek Prasad, University of South Carolina, U.S.A. (2011). Association of cardiorespiratory fitness and parental history of hypertension with incident hypertension. Research mentoring.
19. Vivek Prasad, University of South Carolina, U.S.A. (2011). Association of heart rate reserve and incident hypertension. Independent study research mentoring.
20. Katie Becofsky. University of South Carolina, U.S.A. (2012). Association of cardiorespiratory fitness and fatness on depression. Independent study research mentoring.
21. Aditi Narsale and Song Gao. University of South Carolina, U.S.A. (2012). Resting heart rate on cancer mortality. Research mentoring.
22. Arpit Saxena and Dawn Minton. University of South Carolina, U.S.A. (2012). Resting heart rate on cardiovascular and all-cause mortality. Research mentoring.
23. Amanda Paluch. University of South Carolina, U.S.A. (2012). Sodium intake on incident hypertension: Effect of cardiorespiratory fitness. Independent study research mentoring.
24. Lujing Zhan. University of South Carolina, U.S.A. (2012). Fish and seafood consumption and weight control. Independent study research mentoring.

After Appointment at Iowa State University

Major Professor / Supervisor

Research Staff

25. Shannon Kooima. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2017-2018.
26. Taylor Watson. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2017-2018.
27. Joseph Saavedra. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2018-2019.
28. Katie McGriff. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2018-2019.
29. Aaron Stravers. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2019-2020.
30. Kacie Schumann. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2018-2021.
31. Tyler Schmidt. Full-time Research Associate for CardioRACE NIH project. Iowa State University: 2019-2021.

Post-Doctoral Fellow

32. Angelique G. Brellenthin. PhD from University of Wisconsin-Madison (2017). Department of Kinesiology (Major: Exercise Psychology). Iowa State University: 2016-2020.
33. Bong Kil Song. PhD from Seoul National University (2018). Department of Physical Education (Major: Physical Activity Epidemiology). Iowa State University: 2019-2022.
34. Elizabeth C. Schroeder. PhD from University of Illinois at Chicago (2020). Department of Kinesiology and Nutrition (Major: Integrative Exercise Physiology). Iowa State University: 2020-2023.

PhD

35. Nathan F. Meier. Iowa State University, U.S.A. (2018). Physical activity and sarcopenia in older adults.

36. Elena Martinez Rosales. Visting PhD from University of Almeria in Spain (2021, 2022).
37. Franchesca J. Porter. Iowa State University, U.S.A. (2023-2024).
38. Xiangyu Zhai. Visting PhD from Waseda University in Japan (2023-2024).
39. Joseph Saavedra. Iowa State University, U.S.A. (2024). Physical activitiy and lung health in the aging population.
40. Jiyeon Yoon. Iowa State University, U.S.A. 2024 spring semester only, then transferred to the University of Pittsburgh from 2024 fall.

MS

41. Elizabeth C. Schroeder. Iowa State University, U.S.A. (2015). Independent and combined effects of aerobic and resistance training on blood pressure (ART-B). MS thesis.
42. Esmée Bakker. Research Internship from Radboud University Medical Center (Epidemiology major in Master program), Netherlands. (2016). The associations of physical activity (aerobic and resistance) and sedentary behavior with the development of cardiovascular risk factors and cardiovascular morbidity and mortality.
43. Yuehan Wang. Research Internship from Radboud University Medical Center (Epidemiology major in Master program), Netherlands. (2018). The association between muscular strength and leisure-time running and type 2 diabetes.
44. Heather Danzer. Iowa State University, U.S.A. (2018). Effects of aerobic and resistance exercise on health-related quality of life in inactive adults with elevated blood pressure. MS thesis.
45. Markus Flynn. Iowa State University, U.S.A. (2019). Effect of physical activity as a moderator on the association between perceived racial discrimination and depression in African Americans.
46. HyunSoo Kim. Iowa State University, U.S.A. (2019). Associations of muscular strength and cardiorespiratory fitness with bone mineral density in older adults.
47. Emma E. Albin. Iowa State University, U.S.A. (2019). Associations of cardiorespiratory fitness and muscular strength with arterial stiffness in older adults.
48. Leidys Gutierrez-Martinez. Iowa State University, U.S.A. (2020). Associations of step counts and aerobic stepping cadence with arterial stiffness in older adults.
49. Alberto Palmero Canton. Iowa State University, U.S.A. (2021). Effects of cardiorespiratory fitness and muscular strength on the association between arterial stiffness and depression in older adults.
50. Taline R. Jouzi. Iowa State University, U.S.A. (2024). Associations of cardiorespiratory fitness and muscular strength with sleep quality in older adults.

Committee Member

PhD

51. Youngwon Kim. Iowa State University, U.S.A. (2015). Sedentary lifestyle and obesity in adults.
52. Yang Bai. Iowa State University, U.S.A. (2016). School fitness assessment and promotion: State and national evaluations with FITNESSGRAM.
53. Karissa Peyer. Iowa State University, U.S.A. (2016). Longitudinal validity of the FNPA screening tool to predict changes in weight status in children.

After Appointment at University of Pittsburgh

Major Professor / Supervisor

Research Staff

67. Chloe Neely. Full-time Research Associate for DoReps NIH project. 2024-Present.
68. Angelina Monti. Full-time Research Associate for DoReps NIH project. 2024-Present.
69. Autumn Gibala. Part-time phlebotomist for DoReps NIH project. 2024-Present.

Post-Doctoral Fellow

70. Nicholas Goode. PhD from East Tennessee State University (2024). Department of Exercise Science (Major: Sport Physiology and Sport Performance). 2024-Present.

PhD

71. Jiyeon Yoon. University of Pittsburgh, U.S.A. 2024-Present.

Committee Member / Examiner

PhD

72. Joseph Saavedra. Iowa State University, U.S.A. (2024). Physical activitiy and lung health in the aging population. Served as an external committee member.
73. Le Wei. The University of Sydney, Australia. (2025). The intensity of free-living stepping activities: influence of key methodological choices on the magnitude and precision of its associations with health outcomes. Served as an external Examiner.

MISCELLANEOUS

Media Appearances

The followings are selected media appearances and interviews that I have participated in regarding my research articles (On average, I participate in 1 media interview per month).

- Research article (titled “Mortality trends in the general population: the importance of cardiorespiratory fitness”) published in *J Psychopharmacol* in 2011 (as first author) has been featured in ‘The New York Times.’
- Research article (titled “Does physical activity ameliorate the health hazards of obesity?”) published in *Br J Sports Med* in 2011 (as first author) has been featured in several media outlets including ‘LA Times’ and ‘Chicago Tribune.’
- Research article (titled “Long-term effects of changes in cardiorespiratory fitness and body mass index on all-cause and CVD mortality in men: The Aerobics Center Longitudinal Study”) published in *Circulation* in 2011 (as first author) has been featured in over 200 major media outlets around the world including ‘TIME’, ‘CNN’, ‘The Washington Post’, ‘Forbes’, ‘Discovery News’, ‘WACH Fox TV’, and ‘WLTN TV’ (CBS-affiliated TV station in Columbia, SC).
- Research article (titled “Changes in fitness and fatness on the development of cardiovascular disease risk factors focusing on hypertension, metabolic syndrome, and hypercholesterolemia”) published in *J Am Coll Cardiol* in 2012 (as first author) has been featured in over 100 major media outlets including ‘The New York Times’ and ‘Chicago Tribune.’
- Research abstract (titled “Running and all-cause mortality risk – Is more better”) presented in the ACSM annual meeting in 2012 (as first author) has been featured in over 100 media outlets including ‘The New York Times’ and ‘US News’.
- Research article (titled “Leisure-time running reduces all-cause and cardiovascular mortality risk”) published in *J Am Coll Cardiol* in 2014 (as first author) has been featured in over 350 major media outlets around the world including ‘NBC News’, ‘ABC News’, ‘The New York Times’, ‘LA Times’, ‘CNN’, ‘The Washington Post’, ‘Forbes’, ‘UK Mirror’, ‘Calgary Herald’, ‘Times of India’, ‘Le Magazine de la Sante’, ‘Voice of Russia’, ‘TV Asahi’, ‘KBS’, ‘MBC’, ‘SBS’.
 - YouTube video: <https://www.youtube.com/watch?v=wUyU-RU8O1w>
 - TV Interview: <http://whotv.com/2014/08/19/running-study-less-may-be-more>
- TV Interview “Iowa State Exercise Study Seeking Participants”: <http://whotv.com/2014/09/09/iowa-state-exercise-study-seeking-participants>
- Research article (titled “Running as a key lifestyle medicine for longevity”) published in *Progress in Cardiovascular Diseases* in 2017 (as first author) has been featured in over 200 major media outlets around the world including ‘The New York Times’, ‘TIME’, ‘Runner’s World’, ‘The Guardian’, ‘Naver’.
- Research article (titled “Associations of resistance exercise with cardiovascular disease morbidity and mortality”) published in *Medicine & Science in Sports & Exercise* in 2019 (as corresponding author) has been featured in over 200 major media outlets including ‘The New York Times’, ‘US News & World Report’, ‘WebMD’, ‘Reader’s Digest’, ‘MSN.com’, ‘Men’s Health.’
- Research article (titled “Associations of muscular strength and incidence of type 2 diabetes”) published in *Mayo Clinic Proceedings* in 2019 (as corresponding author) has been featured in over 100 major media outlets including ‘CNN’, ‘US News & World Report’, ‘Yahoo News’, and over 50 TV News.
- Research article (titled “Leisure-time running reduces all-cause and cardiovascular mortality risk”) published in *J Am Coll Cardiol* in 2014 (as first author) was featured in ‘The New York Times’ article titled, “Even Short Runs Have Major Health Benefits” in 2023 (<https://www.nytimes.com/2023/10/21/well/move/running-short-distance-health.html>).
- Research article (titled “Leisure-time running reduces all-cause and cardiovascular mortality risk”) published in *J Am Coll Cardiol* in 2014 (as first author) was featured in ‘The New York Times’ article titled, “Running vs. Walking: Which Is Better for Lasting

Health?” in 2023 (<https://www.nytimes.com/2023/11/14/well/move/walking-running-health-benefits.html>).

- Research article (titled “Aerobic, resistance, or combined exercise training and cardiovascular risk profile in overweight or obese adults: the CardioRACE trial”) published in *European Heart Journal* in 2024 (as first author) was featured in ‘*Outside*’ article titled, “I have a limited amount of time to exercise. Should I do cardio or lift weights?” in 2024 (<https://www.outsideonline.com/health/training-performance/less-cardio-more-strength/>).
